PROFESSIONAL SUMMARY

Software Engineer with experience building cloud-native and AI-powered applications using Java, Python, AWS. Experienced in backend development, REST APIs, and scalable data platforms through internships at Amazon and Anugat AI.

EDUCATION

Bangalore Institute of Technology

B.E - 8.5 - CGPA

Expected 2026

Bengaluru, Karnataka

SKILLS & COURSEWORK

Languages:	Java, Python, SQL
Cloud & Platforms:	AWS (Lambda, S3, CDK, DynamoDB), Amazon Bedrock
Backend & APIs:	API, REST APIs
Systems & Concepts:	Operating Systems, DBMS, OOP
Developer Tools:	Git, GitHub, VS Code, IntelliJ IDEA

WORK EXPERIENCE

Amazon - Internship (6 Months)

Data Engineer

Jul 2025 – Dec 2025

Bengaluru, Karnataka

- Improved Text2SQL accuracy for an Amazon Bedrock agent through prompt optimization and structured query generation.
- Built automated insight generation pipelines enabling faster data-driven decision making.
- Developed workflows using AWS Lambda, S3, Bedrock, and Python to automate data processing and insight generation.

Anugat AI - Internship

Full Stack Developer

April 2026 – May 2026

Bengaluru, Karnataka

- Developed and deployed the company's primary website, enhancing user experience and responsiveness.
- Built frontend, backend, and REST API modules for Samayak, an AI-powered academic management platform.

PROJECTS

AI-Powered Personal Expense Intelligence System | Python

- Developed an intelligent expense tracking system that categorizes transactions and provides actionable financial insights.
- To analyze spending patterns and generate personalized recommendations.
- Built an interactive dashboard for real-time visualization of expenses, trends, and budget analysis.

CricSim Pro – Full-Stack Multiplayer Cricket Simulation Platform | React, CSS, Socket.io

- Developed a real-time multiplayer cricket simulation using WebSockets for low-latency communication and synchronized game state updates.
- Developed REST APIs and WebSocket services using Node.js and Socket.io to support real-time multiplayer gameplay.
- Supported scalable concurrent users through modular backend architecture using event-driven communication patterns.

E-Commerce Website for Rural People | React, CSS, Node.js, Firebase

- Developed a localized e-commerce platform enabling rural communities to access online marketplaces.
- Improved data reliability and user security with real-time synchronization and secure authentication.
- Improved community engagement by enabling local updates and region-specific content delivery.

CERTIFICATIONS

- Cisco Forecast League, FY2025
- Goldman Sachs – Software Engineering Job Simulation
- Tata Group – Data Visualisation: Empowering Business with Effective Insights Job Simulation

EXTRACURRICULAR

Rotaract Club of Bangalore Institute of Technology | Secretary, Photographer

Led community initiatives including blood donation and winter donation drives involving 2000+ participants.

Developers Society Club | Marketing Lead

Pioneered a UI/UX design competition, training students ; competition findings led to the creation of a new mentorship program.

Under 25 BIT | Marketing and Photography Lead

Organized the Under 25 Campus Summit with 700+ attendees, managing event planning, coordination, and execution. Successfully conducted a college-wide Dandiya Night, overseeing logistics and student engagement while collaborating with volunteers.
